

For Immediate Release

FuelRod Mobile Charging Service Comes to Indiana with New Kiosks at Airport and Holiday World & Splashin' Safari

FuelRod Service Expands in Midwest to Deliver Convenient Smartphone Battery Charging

SAN DIEGO — May 23, 2019 — Tricopian, Inc., a San Diego, California-based developer of the innovative [FuelRod](#) mobile charging service for smartphones and tablets, is expanding its footprint in the Midwest. The Indianapolis International Airport (IND) and Holiday World & Splashin' Safari combination theme park and water park in Indiana are now offering the innovative FuelRod on-the-go charging service for travelers and park visitors.

With FuelRod portable chargers, smartphone and tablet users can keep their devices charged with the lightweight FuelRods that can be purchased from the Power-Ready-to-Go SwapBox™ kiosks located throughout the airport and parks. Instead of searching for available electrical outlets, charging stations or costly rental options, users simply locate the closest FuelRod SwapBox, purchase a fully charged FuelRod and charge-up their device. Once the FuelRod is depleted, customers simply exchange their FuelRod at any SwapBox kiosk for \$1.00 and receive a fresh, fully charged unit. Customers can also recharge the FuelRod via any USB source using the connectors included in the kit.

To celebrate the Midwest expansion and just in time for the Indianapolis 500, users can save \$2 off the purchase of a new FuelRod kit or swaps at any U.S. kiosk using the code INDY19 through May 31, 2019.

“With over 400 SwapBox kiosks across the U.S., we’re very pleased to add the Indianapolis Airport and Holiday World & Splashin’ Safari to our growing Midwest portfolio,” said FuelRod co-founder Joe Yeagley. “Our new Indiana locations join airports and theme parks in Missouri, Minnesota and Ohio giving Midwesterners a great convenience for keeping their mobile devices charged on the go nearby and across the country from coast to coast.”

Customers simply purchase a FuelRod portable charging kit complete with USB connection cables and charge-up. By swapping a used FuelRod for a fully recharged one at any SwapBox kiosk, users have the convenience of keeping their devices powered on the go and help to keep batteries out of landfills.

FuelRod SwapBox kiosks at a growing number of locations in the U.S. and Europe. In addition, FuelRod chargers can be purchased online at www.fuel-rod.com. FuelRod can be found on Twitter [@FuelRodPower](https://twitter.com/FuelRodPower) and on Facebook at [FuelRodPower](https://www.facebook.com/FuelRodPower).
